SOLUTIONS

ACCESSPOINT CLOUD AND ACCESSPOINT ULTRAVIEW CORE FEATURES

- Zero Footprint Viewer - With video controls enabling 4-up remeasurements, speed adjustment, brightness/contrast controls, screenshot captures, and more.
- Measurements - Length, volume, density, area, line segment, thickness, doppler, doppler, VTI, time, MM, distance, among others.
- Intelligent Structured Reporting - One-button statement creation for Intelligent Reporting and Normal statements, measurement calculations, and customized look and feel.
- System Extensions - Embedded support for screenshots, diagrams, and freehand graphics. HL7-based EHR integration, and compatible plug-ins including, Nuance, Q-Lab and Invia applications.
- Archiving - Multiple storage options including on-site, off-site, disaster recovery and long-term archiving.
- Local Option Add On - Seamless integration with AccessPoint™ Advanced Workstation and image processing tools with compatible plug-ins.

ULTRAVIEW ENHANCED FEATURES

- Multi-modality functionality - Radiology, Cardiology, Ophthalmology, Surgery, Dermatology, and others.
- Measurements - Draw and measure lines, angles, polygons, ellipses, areas, volume, and Cobb angle
- Annotations - Write, edit and view text annotations
- 3D Extension - The optional 3D module provides many alternate views of the original data with reconstruction techniques including MPR and MIP
- Electrocardiography - ECG analysis tools allows users to zoom, measure and quantify ECG data

STUDYSHARE ADVANTAGES

- No More Disks - Providers can securely store and share medical imaging studies and reports without burning disks or downloads.
- Reduce Operating Expenses - Eliminates physical disk inventory, labor, and distribution costs for referral copies to providers and patients.
- Increase Efficiency - Share current and prior studies, including reports, through a secure web link without network and workflow limitations.
- Better Care Experiences - Quickly deliver requested studies for immediate access so treatment starts faster, improving patient and referring physician satisfaction.
- 21st Century CURES Act Compliance - StudyShare helps keep you compliant when patients request their personal health information be shared with third parties.

AccessPoint

SOLUTIONS

ACCESSPOINT ADVANCED WORKSTATION

- **Measurements** -The Advanced Workstation viewer contains preset measurements including 2-D, M-Mode, Vascular and Doppler. Offline measurements can also be taken and uploaded at a later time.
- **DICOM Imaging** -Studies are loaded and saved automatically from networked imaging devices to streamline workflow and eliminate the intermediate step of saving first to a media file.
- **Fast Study Load** - DICOM studies load quickly from media or hard drive and display quickly from image to image.
- **Storage Options** - AccessPoint offers a wide array of storage solutions for your clinical workflow including: CD/DVD, Disk/SAN/NAS, PACS/VNA, Cloud, and Data Center.
- **Image Presentation** - Advanced Workspace allows for a modular, customizable layout. One-up, four-up, nine-up, or side-by-side image comparisons aid diagnostic utility and are easy to use. Quickly review a specific loop or image with the thumbnail display.
- **Compatible with AccessPoint Cloud & AccessPoint UltraView** - Optional seamless integration with AccessPoint Cloud allows for read anywhere access. Retrieve fully diagnostic DICOM images via high-speed internet connection from our HIPAA compliant data center.

ACCESSPOINT INTELLIGENT REPORTING

- **Drop-Down Phrase Files** - Provide rapid, coded entry of commonly used phrases. Completely customizable, drop-down phrases ensure fast, consistent data entry while allowing full edit capabilities.
- **Auto Population** - Automatically populates demographics and measurements into the templates quickly, efficiently, and error free.
- **Intelligent Structured Reporting** - Automatically selects phrases based on user defined clinical parameters to increase efficiency and to minimize, or completely eliminate, transcription costs.
- **Dual Monitor Support** - AccessPoint™ Advanced Workspace fully supports a dual monitor environment with studies displayable on one monitor and reports on the other.
- **Automated Data Export** - Finalizes, electronically signs, and publishes a report to an EMR/EHR system with a single click for increased diagnostic utility.
